Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

The applicant traversed the rejection for claims 1 – 30, 32 – 34, 36 – 38 and 40 – 44.

Currently claims 1 – 30, 32 – 34, 36 – 38 and 40 – 44 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 30, 32 – 34, 36 – 38 and 40 – 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dodd (US 6,633,849 B1) in view of “Will Gift Lists Click?” New York Times; New York, November 18, 1999 and hereafter referred to as “Wish Lists”.

Regarding claim 1 and related claims 8, 15, 22, 29, 33, 37 and 41 (previously presented), Dodd teaches a method and system for automatically sending an order from a first user to a recipient over a computer network, the method comprising: receiving order selections from a computer of the first user; saving stored order data, the stored order data including the order selections and order purchase information; generating a web page having an address and containing the order selections and order purchase

information from the stored order data; and in response to a first user request, automatically producing and sending an electronic mail message having the address of the web page to a computer of the recipient and generated from the stored_order data, the electronic mail message identifying the stored order and order purchase information and allowing the recipient to select the stored order using the web page wherein the stored order is not ediatable by the recipient and generating the web page and electronic mail message from the stored order data simplifies operation (see at least Abstract, Col 2, lines 23 – 40, Col 3, lines 30 – 55 and Figure 5).

While Dodd does disclose the same method and system claimed, Dodd does not specifically disclose and teach purchasing.

On the other hand and in the same area of online ordering and recipient gift selection, Wish Lists does disclose and teach purchasing by the recipient (see at least Page 2, Para 2).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the method and system of Dodd with the method and system of Wish Lists to have enabled a method and system for automatically sending an order from a first user to a recipient over a computer network, the method comprising: receiving order selections from a computer of the first user; saving stored order data, the stored order data including the order selections and order purchase information; generating a web

page having an address and containing the order selections and order purchase information from the stored order data; and in response to a first user request, automatically producing and sending an electronic mail message having the address of the web page to a computer of the recipient and generated from the stored_order data, the electronic mail message identifying the stored order and order purchase information and allowing the recipient to purchase the stored order using the web page wherein the stored order is not ediatable by the recipient and generating the web page and electronic mail message from the stored order data simplifies operation. Dodd discloses all the claim limitations with the exception of purchase (Abstract, Col 2, lines 23 – 40, Col 3, lines 30 – 55 and Figure 5). Wish List discloses purchase (Page 2). Therefore, one of ordinary skill in the art would have been motivated to extend the method and system of Dodd with a purchase feature. In this manner, the user satisfaction with the method and system will be increased as result of providing items that they want the recipient to purchase for them, especially distant relatives who are not familiar with the user's preferences.

Regarding claim 2 and related claims 9, 16 and 23 (Original), Wish Lists teaches a method and system, further comprising producing a display of the stored order for potential purchase by the recipient (Page 2)

Regarding claim 3 and related claims 10, 17 and 24 (Original), Wish Lists teaches a method and system, wherein the display-producing step comprises producing a web page display of the stored order for purchase by the recipient (Page 2)).

Regarding claim 4 and related claims 11, 20 and 28 (Original); Dodd teaches a method and system, wherein the electronic mail message includes a URL which allows for the construction of a web page displaying the stored order (Col 4, line 26 and lines 44 - 46).

Regarding claim 5 and related claims 12, 18 and 25 (Original), Dodd teaches a method and system, wherein the stored order includes a single item (see at least Col 4, lines 52 - 59).

Regarding claim 6 and related claims 13, 19 and 26 (Original), Dodd teaches a method and system, wherein the stored order includes a main item and at least one accessory (see at least Col 4, lines 52 - 53).

Regarding claim 7 and related claims 14, 21 and 27 (Original), Dodd teaches a method and system, wherein the step of receiving the order selections includes providing an electronic display of possible selections for the user (see at least Figures 1A - 2F).

Regarding claim 30 and related claims 34, 38 and 42 (Original), Dodd teaches a method and system, wherein the first and second order selections are selected from a web page from an electronic commerce site (see at least Abstract and Col 1, lines 34 - 51)

Regarding claim 32 and related claims 36, 40 and 44 (Previously Presented), Dodd teaches a method and system, wherein the display of a web page for the first or second orders includes a link to a display of the items of the first order and a display of the items of the second order (see at least Figures 1A-2F).

Regarding claim 43 (Previously Presented), Dodd teaches a method and system wherein the display of the first and second stored orders comprise a web page (see at least Figures 1A-2F).

Response to Arguments

Applicant's arguments, filed 10-22-04, with respect to the rejection(s) of claim(s) 1 – 30, 32 – 34, 36 – 38 and 40 – 44 under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of "Wish List".
